

# BigKeys LX

a full-featured alternative keyboard  
with 60 1-inch-square keys

## Features of BigKeys LX

- **Punctuation Keys & Special Characters** All punctuation keys and special characters found on a standard keyboard are included on BigKeys LX, except the numeric keypad.
- **F1 - F10 Keys** Press and hold the "F" key and the numeric keys become F1 - F10. For example, pressing the F and 1 keys simultaneously yields F1.
- **Cursor Keys: PgUp, End, PgDn, Home** Press and hold the "F" key and the arrow pad keys become Page Up, End, Page Down, and Home.
- **Assist Mode** To accommodate one-handed operations, BigKeys LX provides an Assist Mode. In Assist Mode, function keys can be produced by successively pressing F and the numeric key (rather than *simultaneously* pressing the 2 keys).
- **"Run On" eliminated** A single key depression causes one character to be sent to the computer, no matter how long it is held down.
- **Switchable QWERTY or ABC key layout** Order either key layout. Built-in logic allows switching to meet future needs.
- **Key color options** BigKeys LX is available with bright **White** keys (black lettering), bright **Yellow** keys (black lettering), **Multi-Color** keys (black lettering), or **Black** keys (white lettering).
- **No special software required** Just plug BigKeys LX into your computer in place of the standard keyboard

## BigKeys LX Specifications:

- ◆ Standard dimensioned keyboard: 7 inches by 19 inches.
- ◆ 60 oversized keys: every key on the BigKeys LX keyboard is extra large: 1" square.
- ◆ Extra-long, non-coiled cable.
- ◆ PS/2 connector or USB connector, making BigKeys compatible with PC or Macintosh computers.
- ◆ Top quality click-style key switches, tested to over 10 million keystrokes.
- ◆ High-impact injection-molded ABS case and keycaps.
- ◆ Wear-resistant keycap printing.
- ◆ 5 Year Repair/Replace Warranty.
